EDUCATION

Programming Technician
2023–2028 (expected)
Technikum Łączności im. Mikołaja Kopernika, Poznań (ZSŁ)

LANGUAGE & TOOLS

- English: comfortable discussing technical topics
- Daily driving linux
- Docker, Git / GitHub

SKILLS

- Java 17/21, Kotlin, Maven
- Spring Boot, Spring Security
- Spring Data JPA
- JUnit 5, Mockito, Playwright
- REST APIs, WebSocket/STOMP
- PostgreSQL, Redis
- RabbitMQ, Kafka
- Docker; Kubernetes basics
- GitHub Actions

PROFILE

I'm a Java and Kotlin backend developer building Spring Boot applications. I'm seeking a internship or junior role, part-time alongside school. Remote work and weekends are preferred.

WORK EXPERIENCE

SCHOOL INTERNSHIPS

WPP ES (formerly VML ES)
October 2026; March 2026

- October: stabilized E2E tests (7.5 → 5 min) and enabled parallel runs (4.2 → 2 min).
- Fixed authentication issues and refactored backend code.
- Improved CI/CD checks and automated test execution.
- March: improved UI components using React, TypeScript and SCSS.

PERSONAL PROJECTS

KOTLIN · SPRING BOOT · POSTGRESQL · REDIS · RABBITMQ · DOCKER

https://github.com/Day-fit/Mossy

Mossy

- Built a Spring Boot relay for remote vault access over outbound STOMP/WebSocket connections, without opening inbound ports.
- Routed requests between replicas using Redis and RabbitMQ.
- Implemented device enrollment, signed challenges and encrypted vault-key transfer with X25519 and Ed25519.
- Added JUnit 5/Mockito tests for device trust and concurrent idempotent requests.
- Automated checks and Docker builds with GitHub Actions.
